Patent Pending

O3 Series Iron Reduction System is a revolutionary improvement in the removal of iron from water.

- **Full Flow Bypass Valve.** Simple to use valve allows you to bypass the unit for lawn sprinkling or during maintenance.
- **Less Maintenance.** The only maintenance required is the occasional replenishment of media if the raw water pH is below 7. An easy to use fill port is provided.
- **No Air Compressor.** The noise and expense of compressors are eliminated.
- **No Air Release Valve Required.**
- **No Chemicals.** A chemical regenerant is not required.
- **No Excess Air.**
- **No In-Line Venturi to Plug or Adjust.**
- **Rugged Mechanical Piston Valve.** No solenoids or flapper valves to stick.
